

Protective Care Group

Shaping lives through specialist care

About us

The Protective Care Group was founded in order to offer bespoke and tailor-made support services to children or adults with severe, complex needs who particularly exhibit challenging behaviour. Many of the people supported will have been through the care system and are now either placed in foster care or are with adopted parents. In addition many will have complex needs including Trauma, Attachment Disorder, ASD, ADHD or learning disabilities to name but a few.

Our Management Team bring over 25 years combined experience in both commercial, not for profit and lived experiences, within the areas of learning disabilities, autism, challenging behaviour, LA Quality Frameworks, social work, and adoption. They are passionate about supporting, empowering and giving opportunities to children and adults who are so often overlooked in life, whilst supporting parents, foster carers and other family members through these challenging times.

With our wealth of experience and dedication we offer quality care services to children and adults who need specialised and bespoke care to keep them and the people around them safe.
