

Protective Care Group

Shaping lives through specialist care

Our services

Our approach ensures both children and adults can live a fulfilled life whilst remaining in their own home, or in an environment close to home and as a result, many will go on to access education and other mainstream activities within their community. All of this is fundamental to preventing social isolation and spending months away from home in residential homes and respite centres which often compounds the challenging behaviour and puts huge stress on families.

Children and adults have a right to a fulfilled life, to become part of their community and engage in life experiences wherever possible and our aim is to make this happen through our specialist support packages.

Each support worker recruited by PCG is thoroughly trained and most have worked within other challenging environments for many years. All staff are offered regular counselling and debriefing sessions to ensure their own mental wellbeing, which is a crucial element to ensure longevity and commitment.

We will never give up on a child and will continue with caring and supporting each child regardless of the challenges faced.
